

## QUICK INSTALLATION GUIDE

RGB LEDs Matrix display  
especially suitable for indoor applications

### DISPLAY CONFIGURATION

Display initializes automatically when connecting it to power supply and shows firmware version, ID adresse and option data (IP...). Then it shows last visualized program (execution mode) or remains with display off (STOP mode) awaiting for any comand. The instrument has a default demo program in memory.

The **Dynamic 3** (Configuration and Program Editor) application is used to configure the display and/or modify the information displayed on the screen. This application, **USB** drivers, as well as user manuals for **Dynamic 3**, **DMG-TCP/ASCII**, **DMG-MODBUS** and **DTPM** user manuals can be free downloaded from our website (Dynamic 3 compatible with Windows 7 and above).

**Dynamic 3** allows user to modify/create the program sequences that will be displayed. It is possible to choose character types, the mode how the messages will appear, provide effects, graphics (depending on the model), temporary variables (hour, date, countdown) and numeric (or alphanumeric) variables in real time. It is also possible to create or import graphics and new character types. Programms can be directly displayed or easily transferred to the device memory in file format to be recovered afterwards and then offline visualized.

Indicator configuration from a PC using **Dynamic 3** can be done through **RS232/RS485**, **Ethernet** or **WiFi** (options) besides of **USB** (default).

The option of 4 or 8 digital inputs can work as independent inputs where each input corresponds to a program to be displayed, binary inputs of 4/8 bits (up to 16/256 programs to be displayed) or binary inputs of 3/7 bits + 1 strobe bit to enable the inputs. It is also possible to display the programs in sequential form with a programmable scan interval.

The option of analog input have 2 measuring channels of  $\pm 10V$  or  $\pm 20mA$ . The input type (V or mA), the input signal range as well as the display range (within a maximum range of  $\pm 32000$  points) is fully configurable for each channel.

The default Internet IP address is 192.168.1.100. The communication, optional modules and rest of internal settings are configured through **Dynamic 3**.

Network communications with control of display through an external device as a PLC or PC are available through RS232, RS485, Ethernet or WiFi. The available protocols are **DTPM** (native protocol), **MODBUS RTU**, **MODBUS TCP/IP**, **TCP-ASCII** and **SNTP**.

The option of infra-red (IR) optional remote control allows to activate memorized programmed. Press **MENU** key, select submenu **PROGRAMMES** and desired program on the list of programs stored using arrow keys  $\Delta$  and  $\nabla$ , press **OK** button, the selected program activates immediately.

### DIMENSIONS

According to 2012/19/UE Directive, You cannot dispose of it at the end of its lifetime as unsorted municipal waste. You can give it back, without any cost, to the place where it was acquired to proceed to its controlled treatment and recycling.

# TECHNICAL SPECIFICATIONS

## SPECIAL FUNCTIONS

Automatic brightness intensity control or by software..... (0-100%)  
 Font types and custom graphics editor.  
 Up to 26 internal variables for real-time monitoring.

## POWER SUPPLY AND FUSES

**DMGI1664CF:** .....88-264V AC or 125-373V DC (default)  
 88-132V AC 47/63Hz (special configuration )  
 Maximum power rating:..... 81VA/ F 5A

## VISUALISATION

Graphic resolution ..... 16 x 64 (pixels)  
 Character height 53mm ..... Approx. max. reading dist. ≤ 20m  
 Character height 153mm ..... Approx. max. reading dist. ≤ 55m  
 LED diameter ..... Ø 3mm  
 Pitch ..... 7.2mm  
 LED type ..... SMD  
 LED colour ..... RGB (7 couleurs)  
 Angle vision ..... 120°  
 Numerous character types.

Maximum number of static characters per line.....8/1 ou 10/2

## ENVIRONMENTAL CONDITIONS

Working temperature ..... -10°C ÷ 60°C  
 Relative humidity (non-condensing) ..... <90% @ 40°C  
 Protection degree ..... IP54

## MATERIALS

Frontal display ..... Smoked-grey methacrylate  
 Case ..... Black aluminium  
 Weight (approx.) ..... 5kg

## COMMUNICATION

Ports ..... Mini USB (default)  
 ..... RS232/RS485\*, Ethernet 10/100 or WiFi\*\* (option)  
 Protocols DTPM, MODBUS-RTU, TCP-ASCII, MODBUS TCP/IP, SNTP  
 \*Transmission speed ..... 1200 to 115200 Baud (configurable)  
 \*\*availability depending on radio regulation of the country

## TEMPERATURE SENSOR (OPTION)

Accuracy (-15°C ÷ 60°C) ..... ≤ ±1.5°C

### WIRING CONNECTION

**OPTION /K4:**  
(4 DIGITAL INPUTS)

DIGITAL INPUTS	
PIN 1	24V DC
PIN 2	GND
PIN 3	COMMON INPUTS
PIN 4	INP 4 / STROBE
PIN 5	INP 3
PIN 6	INP 2
PIN 7	INP 1

USB Port

**OPTION /X:**  
(RS232 / RS485)

RS 232		RS 485	
PIN 1	GND	PIN 1	B
PIN 2,3	N.C.	PIN 2	NC
PIN 4	TxD	PIN 3	A
PIN 5	RxD		
PIN 6	5V DC OUT		

USB Port

**OPTION /NW:**  
(ETHERNET WiFi)

ANT. WiFi

USB Port

**POWER SUPPLY**  
85-264V AC  
125-373V DC  
81VA

Recommended fuse: 5A

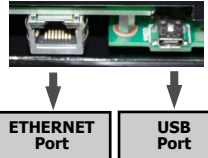

**WARNING Isolation:**  
3000Vrms for 1 minute between input/output and power supply terminals.

**OPTION /K8:**  
(8 DIGITAL INPUTS)

DIGITAL INPUTS		DIGITAL INPUTS	
PIN 1	INP 1	PIN 7	INP 7
PIN 2	INP 2	PIN 8	INP 8 / STROBE
PIN 3	INP 3	PIN 9	N.C.
PIN 4	INP 4	PIN C	COMMON INPUTS
PIN 5	INP 5	PIN -	GND
PIN 6	INP 6	PIN +	24V DC

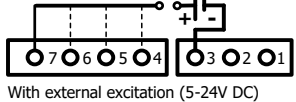

**OPTION /NE:**  
(ETHERNET)

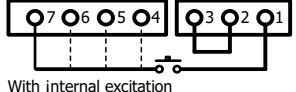

ETHERNET Port

USB Port

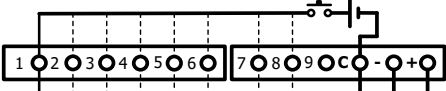

With external excitation (5-24V DC)

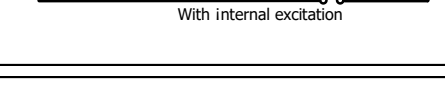

With internal excitation

With external excitation: 5-24V DC

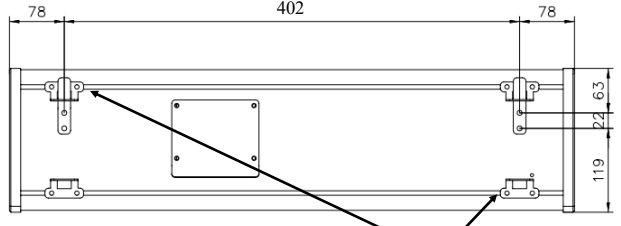

With internal excitation

### MOUNTING

Fixing brackets for wall mounting are supplied with the display.

Horizontal rails with mounting brackets

Rear view of the indicator

Mounting support

### CE conformity.

Directives	EMC 2014/30/EU	LVD 2014/35/EU
Standards	EN 61326-1	EN 61010-1

**WARNING:** If this instrument is not installed and used in accordance with this instructions, the protection provided by it against hazards may be impaired.

To meet the requirements of EN 61010-1 standard, where the unit is permanently connected to main supply, it is obligatory to install a circuit breaking device easy reachable to the operator and clearly marked as the disconnecting device.

To guarantee electromagnetic compatibility, the following guidelines should be kept in mind:

**IMPORTANT!** To guarantee electrical safety according to EN 61010-1 a protective external fuse against overcurrents must be installed.
